BOYS OUT AT NIGHT.

We commend the following article, which we copy from an exchange, to parents generally of this city. It contains some excellent hints and suggestion. which, if carried out, would lead to good results:

I have been an observer, as I am a sympathizing lover of boys,-I love to see them happy, cheerful, gleesome. Indeed, I can hardly understand how a high-toned, useful man can be the ripened fruit of a boy who had not enjoyed a full share of the glad privileges due to youth But while I watch with a very jealous eve all rights and customs which entrench upon the proper rights of boys, I am equally apprehensive lest parents who are not forethoughtful, and have not habituated themselves to close observation on this subject, permit their sons | pleasures as well as its hardships. Houston, say the knowing ones; but we say nonot Sam, or any other old fogy, but a enough to carry the banner of the spread eagle, powerful enough to centre a nation's confidence upon him, and popular enough to call forth a welkin shout from Maine to Kansas. Such a man is Edwin Forrest; and who beside the great American tragedian stands in that position ?

No man that we know of. "Fortunately for Mr. Forrest, he stands well upon the question of nativeism, also. He is an old member of the order of United Americans, a thorough American in heart and soul, and has had the opportunity of standing up for his country. on English ground-a chance which he well improved. The 'boys' all like him. and the men, too, do homage to his talents. To-be-sure, he is a Democrat, and that is why Boston hates him. Never will the old ladies of this fogy city forget his New York oration in 1840, when he took the Sub-Treasury upon his broad shoulders, and carried it up before the people as the ark of their political safety. Never will they cease to hate him for this: and it is just because old! Hartford Convention Boston does hate love him. A man to be aught in the Union, must be a Democrat at heart, and furthermore, he must be hated in Boston. or he will not be loved elsewhere. Forrest is all this, and, therefore, we think his day has come."

A SAD STORY. Frenchman was recently found dead on

who find my body will make no search, is Francis Henry de Longville, born in Paris, April 4, 1828. My father was ruined by an extensive speculation in 1849. I married one of those girls of my happiness assured. I quit my native land with my little family in the month of May, and disembarked at New Orleans, July 24, 1854. > THE SOLAR SYSTEM. A better idea of the relative distances

and magnitude of the bodies in the solar system than can be obtained from orreries and plunispheres, is presented by an astronomical writer in somewhat like the following manner; In the center of a large level plain, three miles in diameter. place a globe two feet in diameter, to represent the Sun. At the distance of eighty-two feet from the globe put a grain of mustard seed, to represent Mercury. the planet nearest the Sun, which gives it an orbit four hundred and ninety-two feet in circumference.
